

BMO is destroying our planet.

Bank of Montreal refused to sign the U.N. Declaration on Responsible Banking which has been signed by more than 100 major banks around the world.

Bank of Montreal received only 0.5 points out of a possible 200 points in the 2020 Banking on Climate Change report released by Banktrack.

Bank of Montreal has more than \$9 billion in outstanding loans to the oil and gas industry and continues to issue new loans every year. Developed fossil fuel reserves already exceed our carbon budget for staying below 1.5°. Any loan that funds fossil fuel expansion puts millions of lives at risk. **But BMO doesn't care.**

**On April 22, 2021, we plan to move our money
unless BMO makes major changes.**

Bank of Montreal Must:

- publicly clarify their position on the relation between climate change and the extraction and burning of fossil fuels
- publicly commit to immediately end their support for all new fossil fuel projects, including exploration, extraction, transportation and power
- publish a robust plan for phasing out their support for all existing fossil fuel projects and companies on a timetable consistent with what is necessary to meet the Paris targets.

Sincerely,

A group of worried parents, grandparents and other kind-hearted souls who are desperate to preserve a habitable planet for future generations.
